

I am writing in response to your "Localism" campaign and proposed expansion of Low Power FM broadcast service. My husband, my son and I enjoy our local FM service providers and hope that LPFM stations will not be allowed to take priority over them.

Our entire family listens to K-LOVE radio, broadcast in our community on 89.7 FM, and in areas where we regularly commute on 103.1 and 91.9 FM. K-LOVE is listener-supported because there is nothing else like it offered on commercial radio whether AM, FM or LPFM. K-LOVE broadcasts a positive message, with wholesome language and lyrics, from its music, to its news presentation, to the staff's interaction with listeners, to its guest commentaries. We are contributing listeners because we need a format like K-LOVE's for our family listening. K-LOVE is truly unique and our community would suffer an irreplaceable loss if its FM translators were pre-empted by LPFM stations. In addition to its broadcast offerings, K-LOVE also serves the public by facilitating fundraisers for local homeless shelters and food kitchens, as well as adoption programs; and offers call-in counseling with local referrals for further services. These services bless more than just K-LOVE's listeners. Please do all in your power to ensure that access to K-LOVE is preserved for our community and the others it serves across the country. Thank you, and may God bless you.
